****PROFESSIONAL SUMMARY****

DYNAMIC COMPUTER ENGINEERING GRADUATE WITH PROVEN EXPERTISE IN AI-DRIVEN WEB APPLICATIONS, FULL-STACK DEVELOPMENT, AND NLP. ADEPT AT INTEGRATING LARGE LANGUAGE MODELS (LLMs) WITH FLASK, REACT, AND SPRING BOOT TO DELIVER SECURE, SCALABLE, AND DATA-RICH SOLUTIONS. RECOGNIZED FOR DELIVERING HIGH-IMPACT PROJECTS THAT IMPROVE USER EXPERIENCE AND OPERATIONAL EFFICIENCY.

****EDUCATION****

Bachelor of Engineering – Computer Engineering

Vidyavardhini's College of Engineering & Technology, Mumbai University

2023 – Present

****Technical Proficiencies****

- ****Languages****: Python, Java, C
- ****Frameworks & Libraries****: Flask, React.js, Spring Boot, RESTful APIs, OpenAI & Ollama GPT
- ****Databases****: MySQL (design, optimization, query tuning)
- ****Tools****: Git, VS Code, Postman, Docker (basic), CI/CD concepts
- ****AI/ML****: LLM integration, NLP pipelines, model inference, data preprocessing

****SELECTED PROJECTS****

- ****AI-Powered Resume Builder (Code O Fiesta)****
 - Engineered a full-stack application where Flask served as the API layer, React handled dynamic UI, and Ollama GPT-OSS 20B performed content generation.
 - Achieved a 30 % reduction in manual resume editing time for users by automating keyword optimization, ATS scoring, and career roadmap suggestions.
 - Implemented secure authentication (JWT) and rate limiting to protect against misuse.
- ****Canteen Tracking & Management System****
 - Built a real-time order tracking platform with React front-end, Spring Boot back-end, and MySQL persistence.

- Designed role-based dashboards; increased order processing efficiency by 25 % through optimized REST APIs and asynchronous processing.
- Deployed database schema improvements that cut query latency by 18 %.

****PROFESSIONAL EXPERIENCE****

Intern – FullStack & AI Development (University Research Lab, 2024)

- Collaborated on a prototype for an AI-augmented learning analytics dashboard using Flask and React.
- Integrated an LLM for summarizing student feedback, boosting sentiment analysis accuracy from 70 % to 88 %.
- Conducted load testing and implemented caching strategies, raising system throughput by 40 %.

****Certifications****

- Python Programming – Advanced Python Course, Udemy (2024)
- NISM Series XII – Securities Markets Foundation (in progress)

****Key Achievements****

- Finalist, Code O Fiesta 2025 for AI-Resume Builder project (top 5% among 300+ participants).
- Consistently ranked in the top 10 % of class for project-based coursework.
- Contributed to 3 open-source Python libraries, improving issue resolution time by 15 %.

****Interests****

- AI-powered financial analytics
- Automation of enterprise workflows
- Cutting-edge fullstack development
